

# Linking social work and treatment efforts in connection with khat addiction in diaspora

**The Iftiin project consists of an outreach effort and a treatment effort**

## **The outreach effort**

- Somali employees perform outreach work in the streets
- In-home support staff and staff that builds bridges between the system and the user
- Information service
- Activities: exercise, drop-in centre, communal meals.

## **The treatment effort**

- Treatment services in the local community
- Involving outreach employees with dual cultural backgrounds in the treatment
- Cognitive treatment options adapted to the target group
- Employment initiatives.
