

**RESEARCH CONFERENCES**

**ESF-COST High-Level Research Conference**

**Understanding Extreme Geohazards: The Science of the Disaster Risk Management Cycle**

**Hotel Eden Roc, Sant Feliu de Guixols, Spain**

**27 November - 2 December 2011**

**List of Accepted Posters**

<b>Name</b>	<b>Affiliation</b>	<b>Poster Title</b>
1 Andrei Bala	National Institute for Earth Physics, Magurele-Bucharest, Romania	Assessment of the seismic site effects based on earthquake recordings and in situ borehole measurements in Bucharest, Romania
2 Francesca Ferrario	Insubria, Como, Italy	Late Quaternary environmental catastrophes and landscape evolution in Northern Italy
3 Rieka Harders	FB 574, Leibniz Institut für Meereswissenschaften an der Universität Kiel, Kiel, Germany	Submarine land sliding on the continental slope off Central America and the influenced of long-term tectonic erosion
4 Malika Larara	Science and technology university Houari Boumediene, Algiers, Algeria	Evidence of paleotsunami deposit in recent sediments of Algiers (Kaddous area)
5 Constantinos Loupasakis	National Technical University of Athens, Athens, Greece	Geohazards in Greece - Extreme Landslides and Extensive Land Subsidence Phenomena
6 Prince Chinedu Mmom	University of Port Harcourt, Port Harcourt, Nigeria	Assessing the perception, efficacy of indigenous Knowledge and adaptation systems to flood disaster risk in the Niger Delta, Nigeria: implications for Sustainable Geo-hazard management
7 Maria Ortuno	Universidad Nacional Autonoma de Mexico, Queretaro, Mexico	Incorporating geologic data into the calculation of the seismic hazard: an example of Central Mexico. María Ortuño, Ramón Zúñiga, Angel Figueroa-Soto Geosciences Centre, UNAM-Juriquilla (Mexico)
8 César Ranero	ICREA at CSIC, Barcelona, Spain	Hazards in the Aegean: in-Depth Experiment to Study Tectonic Structure and Seismic Activity
